```
% LAB7 Checks functionality of FIR window design
%      Place this file in same directory as your
%      rectfilt, hammingfilt and kaiserfilt functions.
```

## Part 1: Check filter design

```
test_lab7a
```

```
Testing 'rectfilt' with N=21 and wc=0.25: O.K.
Testing 'rectfilt' with N=31 and wc=0.25: O.K.
Testing 'rectfilt' with N=41 and wc=0.25: O.K.
Testing 'rectfilt' with N=21 and wc=0.50: O.K.
Testing 'rectfilt' with N=31 and wc=0.50: O.K.
Testing 'rectfilt' with N=41 and wc=0.50: O.K.
Testing 'rectfilt' with N=21 and wc=0.75: O.K.
Testing 'rectfilt' with N=31 and wc=0.75: O.K.
Testing 'rectfilt' with N=41 and wc=0.75: O.K.
```

```
Testing 'hammingfilt' with N=21 and wc=0.25: O.K.
Testing 'hammingfilt' with N=31 and wc=0.25: O.K.
Testing 'hammingfilt' with N=41 and wc=0.25: O.K.
Testing 'hammingfilt' with N=21 and wc=0.50: O.K.
Testing 'hammingfilt' with N=31 and wc=0.50: O.K.
Testing 'hammingfilt' with N=41 and wc=0.50: O.K.
Testing 'hammingfilt' with N=21 and wc=0.75: O.K.
Testing 'hammingfilt' with N=31 and wc=0.75: O.K.
Testing 'hammingfilt' with N=41 and wc=0.75: O.K.
```

```
Testing 'kaiserfilt' with deltaOmega=0.1, delta=0.01:
  N (45) is correct, beta (3.39532) is correct
  Checking wc=0.25: O.K.
  Checking wc=0.50: O.K.
  Checking wc=0.75: O.K.
Testing 'kaiserfilt' with deltaOmega=0.1, delta=0.00097:
  N (73) is correct, beta (5.68242) is correct
  Checking wc=0.25: O.K.
  Checking wc=0.50: O.K.
  Checking wc=0.75: O.K.
Testing 'kaiserfilt' with deltaOmega=0.1, delta=9.7e-05:
  N (101) is correct, beta (7.88642) is correct
  Checking wc=0.25: O.K.
  Checking wc=0.50: O.K.
```

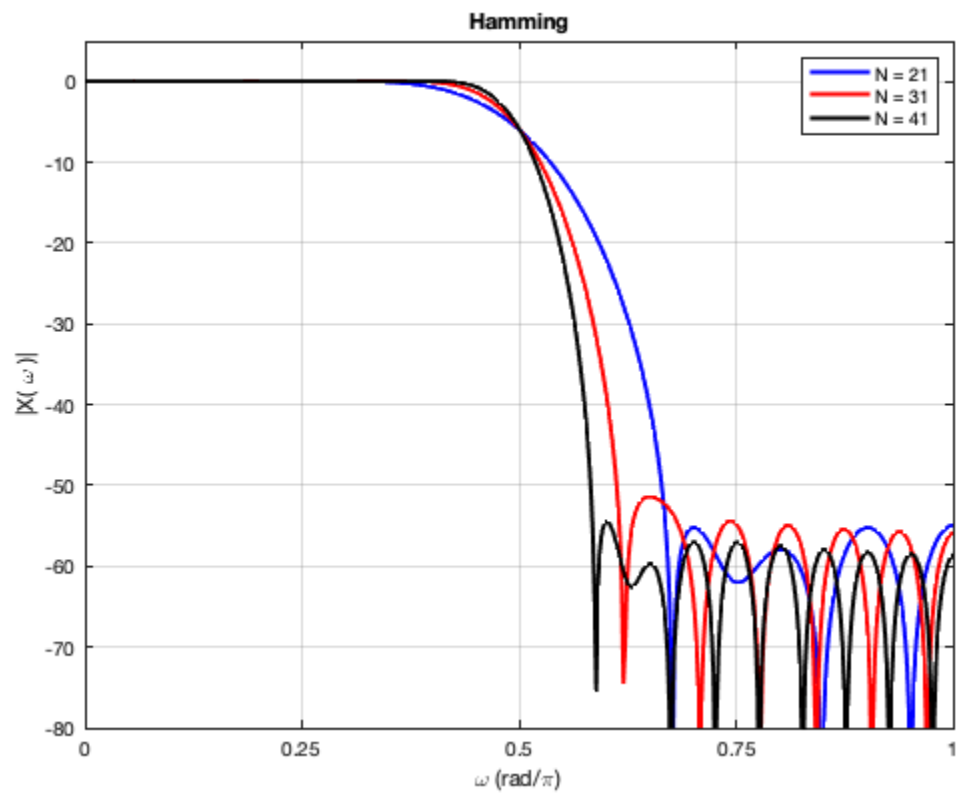

---

Checking  $w_c=0.75$ : O.K.  
Testing 'kaiserfilt' with  $\delta\Omega=0.2$ ,  $\delta=0.01$ :  
N (23) is correct,  $\beta$  (3.39532) is correct  
Checking  $w_c=0.25$ : O.K.  
Checking  $w_c=0.50$ : O.K.  
Checking  $w_c=0.75$ : O.K.  
Testing 'kaiserfilt' with  $\delta\Omega=0.2$ ,  $\delta=0.00097$ :  
N (37) is correct,  $\beta$  (5.68242) is correct  
Checking  $w_c=0.25$ : O.K.  
Checking  $w_c=0.50$ : O.K.  
Checking  $w_c=0.75$ : O.K.  
Testing 'kaiserfilt' with  $\delta\Omega=0.2$ ,  $\delta=9.7e-05$ :  
N (51) is correct,  $\beta$  (7.88642) is correct  
Checking  $w_c=0.25$ : O.K.  
Checking  $w_c=0.50$ : O.K.  
Checking  $w_c=0.75$ : O.K.

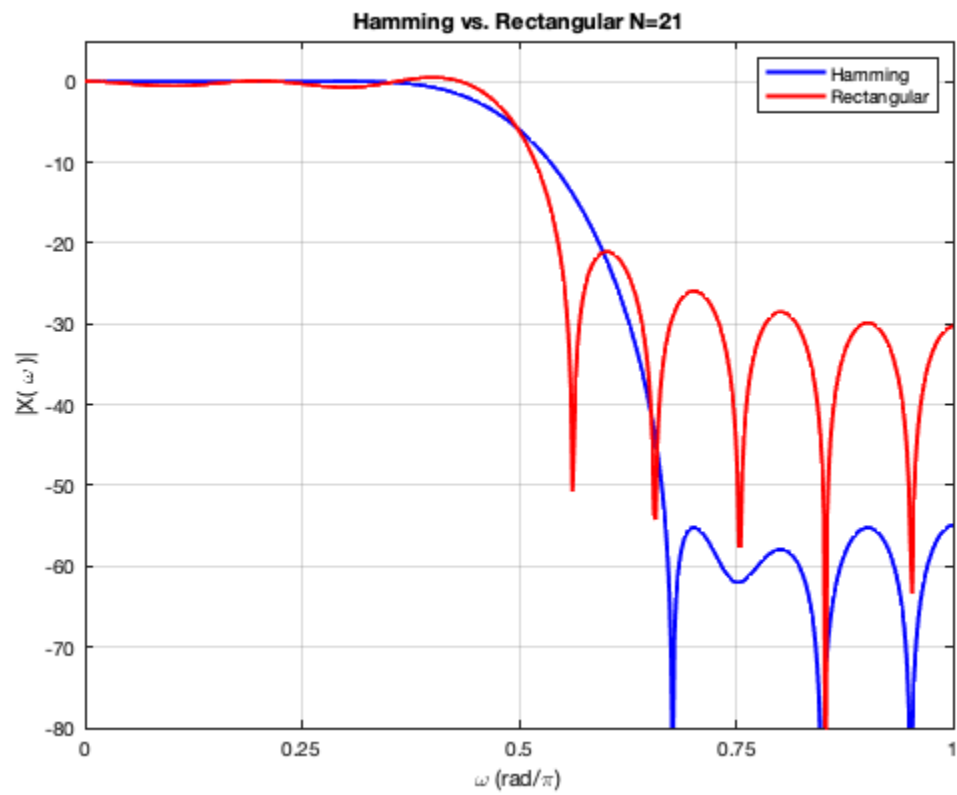

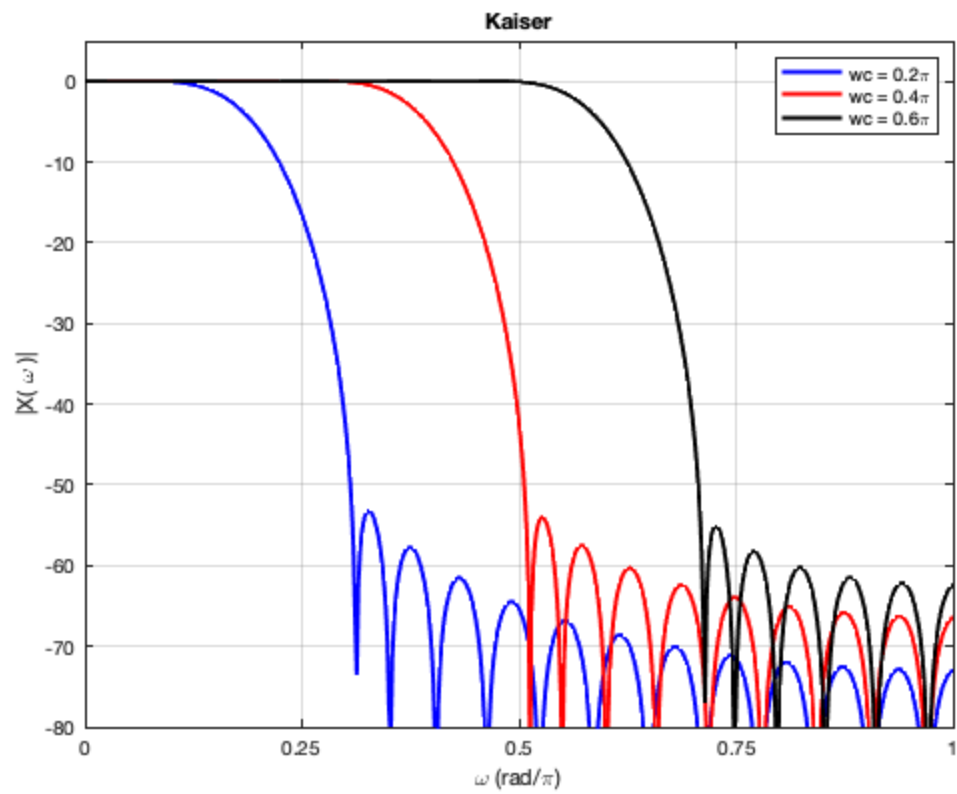

## Part II: Comparative behavior of window filters

test\_lab7b

---

## Part III: Phone tones

test\_lab7c

*Signal to noise ratio of row tones: 49.5022*

*Signal to noise ratio of column tones: 42.8118*

*Published with MATLAB® R2018b*
